Professional Summary

UI Engineer and UX Designer with 10+ years of experience leading design and development of enterprise-scale digital products. Deep expertise in Figma, React, and Design Systems, with a strong record of mentoring cross-functional teams and driving accessibility (WCAG) compliance across organizations. Experienced bridging interaction design and front-end engineering to deliver scalable, user-centered experiences — including AI-driven and agentic interfaces at enterprise scale.

Skills

Frameworks: React, Material UI, Tailwind, Bootstrap, Angular

Languages: HTML5, CSS/SASS, JavaScript, TypeScript

Design Tools: Figma, Adobe Creative Suite, Miro, Sketch, InVision, Zeplin

Other Tools: Git, JIRA, Azure, AEM

Core Skills: UI/UX Design, Interaction Design, Design Systems, Accessibility (WCAG), Prototyping, Generative AI Interfaces, Agentic AI, User Research, Usability Testing, Cross-Functional Leadership

Experience

Frontend Lead / Technical Program Manager

Oct 2025 - Present

AT&T / Consultant via Insight Global, Atlanta, GA

- Lead UI/UX design and prototyping for AT&T's enterprise-scale GenAI initiative, delivering agentic AI interfaces in Figma and Adobe Creative Suite that accelerated design delivery cycles.
- Architected and maintain a WCAG-compliant enterprise design system in React, improving accessibility scores and ensuring consistent component reuse across products.
- Partnered with engineering and product leadership to integrate AI-driven automation into core workflows, translating ambiguous requirements into shipped, user-facing solutions.
- Managed cross-functional collaboration and delivery across design and engineering, mentoring team members and ensuring alignment on architecture, quality, and accessibility standards.

Lead UX Designer / Technical Program Manager

June 2024 - Sept 2025

TechMahindra / BrightSpeed, Remote

- Led a cross-functional initiative to redesign BrightSpeed's Customer Service platform, aligning Product, Engineering, and Design to improve agent workflows and reduce average task time by ~20%.
- Produced wireframes and high-fidelity Figma prototypes aligned with enterprise design standards, partnering with React developers to ensure pixel-perfect implementation.
- Integrated AI-driven automation into existing workflows and user interfaces, collaborating with cross-functional engineering and product teams.
- Conducted user research and workflow mapping in Miro, translating findings into measurable UX improvements across the application.

Lead User Experience Designer

November 2023 - June 2024

TechMahindra / Cricket Wireless, Atlanta, GA (Remote)

- Defined the design language for the Back Office Reskin as a key contributor, integrating Material UI with Figma-based design systems to standardize UI patterns across the product.
- Led cross-functional design review sessions to refine interaction design and improve usability across back-office tools.
- Conducted user testing and stakeholder interviews to validate design solutions, ensuring alignment between user needs and business goals.
- Built AEM-based component libraries to improve UI consistency and reduce design-to-development handoff time across teams.
- Ensured all deliverables met WCAG accessibility standards in alignment with enterprise design system guidelines.

Lead User Experience Designer

July 2021 - July 2023

SpyCloud, Austin, TX

- Solely architected and delivered an NPM-based Design System from the ground up, standardizing 20–50 reusable UI components and design tokens across React — converting legacy CSS to SCSS in the process.
- Owned end-to-end front-end architecture rebuild, serving as the sole designer and developer bridging Figma prototypes through to React implementation.
- Created interactive Figma prototypes to align stakeholders and streamline developer handoff for React implementation.
- Mapped complex user workflows in Miro and led usability testing sessions to optimize customer journeys and measurably improve task efficiency.
- Managed design sprints in JIRA across cross-functional teams, ensuring consistent delivery of accessible, scalable product experiences.

Lead UX/UI Designer and Developer

March 2021 - July 2021

3Data, Austin, TX

- Led all UX/UI design for a 3D data visualization startup, owning the full product design process from concept through interactive Figma prototype.
- Conducted user research and workflow mapping to define interaction patterns for complex 3D data visualization interfaces.
- Delivered responsive, stakeholder-ready prototypes under startup pace, demonstrating ability to move quickly without sacrificing design quality.

UX/UI Developer

June 2019 - March 2021

TCS/Apple Vendor, Austin, TX

- Designed and developed responsive UI components for 3 internal Apple tools using React, AEM, SCSS, and Vanilla JavaScript, aligned with Apple's strict design standards and accessibility requirements.
- Built AEM-based component libraries improving UI consistency and reducing design-to-development handoff time across internal teams.

- Created wireframes, interactive prototypes, and WCAG-compliant layouts, participating in usability evaluations and design sprints to refine features based on user feedback.
- Mentored 1–3 junior developers on code quality, Git workflows, and front-end best practices.

UX/UI Designer

March 2019 - June 2019

LTI/Apple Vendor, Austin, TX

- Led a small team to design and build a new internal application for Apple's customer service and sales organization, saving 50+ staff an estimated 3–4 hours per person per day in manual workflow time.
- Owned end-to-end UX process including stakeholder interviews, design sprints, and usability testing to define and validate the application experience.
- Participated in usability evaluations and design sprints, refining features based on user feedback.
- Developed responsive UI components using Angular, HTML, CSS, and JavaScript, ensuring accessibility and design consistency throughout.

UI Developer

October 2018 - March 2019

NTTData/TxDot Vendor, Austin, TX

- Built and optimized UI components using Angular, HTML, CSS, and JavaScript for Texas Department of Transportation internal tools.
- Collaborated with UX teams to ensure accessibility compliance and design consistency across applications.

UX/UI Designer and Developer

July 2014 - October 2018

DeveloperProgram.com / Constellant, Austin, TX

- Designed and developed responsive web applications using HTML, CSS, JavaScript, and proprietary CMS tools across a 4-year tenure.
- Created interactive prototypes and conducted user testing to validate and refine user experience.
- Provided mentorship and leadership to cross-functional design and development teams.

Education

Anne Arundel Community College, Arnold, MD — Graphic & Web Design

Montgomery College, Rockville, MD — Fine Arts

Professional Development

Adobe Creative Suite, Figma, React, Accessibility (WCAG), AI-Driven Interface Design — ongoing self-directed learning and professional development
